

## Environmental Policy

At OneFamily we recognise that our activities have an impact on the environment in terms of the use of raw materials, emissions to air and water, and waste generation, and seek to minimise this as far as is reasonably practicable.

OneFamily is committed to:

- Continual improvement in its environmental performance;
- Preventing pollution;
- Compliance with all environmental legislation, regulations and codes of practice relevant to the industry sector in which it operates.

It is the policy of OneFamily to:

- Make efficient use of natural resources by conserving energy and water, minimising waste and recycling where possible;
- Meet its duty of care requirements in relation to waste by ensuring the safe keeping, transportation and subsequent recovery or disposal of waste;
- Use recycled construction materials whenever these can be commercially justified;
- Keep transport use to a minimum;
- Work with suppliers to ensure they recognise and reduce the environmental impact of their products and transportation.

This policy is reviewed on an annual basis, taking account of any changes within legislation and our organisation, and any other relevant factors.

We communicate this policy to all our employees and ensure that they are given appropriate training to raise awareness of environmental issues.

This policy is available on request to interested parties including members of the public.
