Family Asset Trust (ISIN GB0003315511)

This Trust is managed by Family Investment Management Limited, part of the group of companies trading as OneFamily.

Investment Objective, Policy and Benchmark

The investment objective is to achieve long-term growth over a ten-year period by directly investing in UK shares.

To achieve its objective, the policy of the Trust is to track the Financial Times Stock Exchange (FTSE) 350 excluding Investment Trusts Total Return Share Index (the Index). The Index represents the 350 largest companies by market capitalisation quoted on the London Stock Exchange excluding any Investment Trusts.

Although the intention is to mirror the Index as closely as possible, the Trust’s composition and weighting may differ if the Manager determines there is difficulty buying and selling assets quickly or the costs to the Trust are too high.

The Trust’s target benchmark is the Index. It is expected that the associated tracking error will be 0.1%, although this cannot be guaranteed. The benchmark has been selected as it matches the investment policy of the Trust.

For the full investment objective, policy and benchmark details, please see section 2 of the Trust’s prospectus which is available on our website or by calling us.

Other information:

- This Trust may not be appropriate for investors who plan to withdraw their money within 10 years.
- You will hold accumulation units which means that any income the Trust earns will be rolled up into the value of your units.
- Units can be bought and sold on any working day.
- Our Remuneration Policy details how remuneration and benefits are determined and awarded and the associated governance arrangements. This can be found in the Society’s Annual Report (Annual Report and Financial Statements), on our website at onefamily.com or can be requested from us free of charge.

Risk and Reward Profile

The Risk and Reward Indicator is designed to give you a guide to the Trust’s level of risk and potential for growth. The higher the number, the greater the potential for growth but the greater the risk of losing money.

The indicator is based upon the rate at which the value of the Trust has moved up and down in the past and is calculated using a method set out in European Union rules. The lowest category does not mean ‘risk-free’.

The shaded area in the table above shows the Trust’s category on the Risk and Reward Indicator.

The Trust has a category of 5 because it has experienced medium to high rises and falls in the past.

You should note that the Trust’s risk category is not guaranteed to remain the same so may change in the future; the category is based on past data and this may not be a reliable indication of the future risk profile of the Trust.

Other risks:

- The Trust may use derivatives for Efficient Portfolio Management (e.g. attempting to reduce the risk or cost of the Trust, or generate additional income or capital). The use of derivatives to increase or reduce the Trust’s exposure to the underlying stock market index may not achieve the described outcomes and this could result in greater fluctuations of the value of the Trust. However, it is not intended that this will cause the risk profile of the Trust to change.
- It is possible to get back less than has been invested.
Charges

The charges you pay are used to pay the cost of running the Trust, including the costs of marketing and distributing it. These charges reduce the potential for growth of your investment.

For more information about charges, please see section 11 in the Trust’s prospectus which is available on our website or by calling us.

One-off charges taken before or after you invest

<table>
<thead>
<tr>
<th>Charge</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Entry charge</td>
<td>5%</td>
</tr>
<tr>
<td>Exit charge</td>
<td>Not applicable</td>
</tr>
</tbody>
</table>

These are the maximum charges that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.

Charges taken from the Trust over a year

<table>
<thead>
<tr>
<th>Charge</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ongoing charge</td>
<td>1.03%</td>
</tr>
</tbody>
</table>

The ongoing charges figure is based on last year’s expenses (for the year ending 31st December 2019) and may vary from year to year.

Charges taken from the Trust under specific conditions

</table>

Past performance

- Past performance is not a guide to future performance.
- The past performance shown takes into account all charges except for the entry charge.
- The Trust was launched on 24th January 1991.
- On 1st April 2009 and then on 8th May 2012, the way in which the Trust invests was changed. Before 1st April 2009, the Trust did not track an Index (or any other benchmark). From 1st April 2009 to 7th May 2012, the Trust closely followed the performance of the FTSE 100 Share Index. This means that the performance shown in the bars marked with a ◆ was achieved under circumstances that no longer apply. Since 8th May 2012, the Trust has closely followed the performance of the FTSE 350 (excluding Investment Trusts) Index.
- Past performance shows the Trust year and is calculated in Pounds Sterling.
