

# Global Equity Fund Factsheet

When you invest with OneFamily, your money buys units or shares in one or more funds. The purpose of this factsheet is to give you information to help you understand how the investment works. If there are any terms you do not understand, please see our “Useful definitions” document, which is available on the fund factsheet section of our website at onefamily.com

## What is the investment objective of the fund?

To provide capital growth through an investment option which aims to achieve a return which follows LIBID plus 5%, gross of fees over rolling 10 year periods. The acronym LIBID stands for London Interbank Bid Rate and is a measure of the average interest rate which major London banks borrow.

## Where is the fund invested?

The OneFamily Global Equity Fund invests almost exclusively in collective investment schemes and will only have indirect exposure to company shares (equities). Investment in collective investment schemes investing in company shares can be up to 100% of the OneFamily Global Equity Fund's net asset value. The Fund will aim to meet its objective by investing in a concentrated portfolio of collective investment schemes with indirect exposure to company shares (equities), with a significant allocation towards UK equities.

The collective investment schemes that the fund invests in will mainly be passively managed but could also be active, and where appropriate have the flexibility to use other assets including derivatives (e.g. futures, forwards) for efficient portfolio management or hedging and liquidity funds.

## What are the risks?

The investment objective expressed is an intended result but there is no guarantee that such a result will be achieved in the short term. Depending on market conditions the investment objective may become more difficult or even impossible to achieve. Capital will be at risk during the period of investment.
